

Digital Marketing **Real Estate** Application

Real-Estate is a cloud based application that provides real estate brokers with the unique features and attributes for ease to sell property and get directly connected with the prospecting customers.

Application Description:-

The portal provides a platform for posting a property and help seller to locate their customers of interest who want to Buy/Rent the property and get their information to take the proper follow ups in an transparent and defined process.

It helps seller/broker to post various properties on his/her own and get directly connected with the buyer and similarly if seller/broker wants to earn through this platform he/she can also keep the minimum subscription plans for other seller/broker who can rent a space and post their own properties.

Unique Customer Value Propositions :-

- Helps Broker to get directly connected to interested customers in buying or renting property
- Broker can earn through this platform by renting a space to other dealers to post their own property on same platform
- Only one time investment needed
- Well managed property details as well as customer data and organized structure
- Flexible option available for either buying application or can rent it on per month basis.
- Friendly and interactive User interface
- Customization available as per the requirement
- One stop solution for all property selling problems
- 15 days free trial available
- Upload unlimited properties images/videos
- Upload 360 degree virtual tour
- Listings with photos and videos
- Get directly connected to the customers
- Real-time messaging
- Setup an appointment online
- Search engine with powerful(Advance) filters
- 24/7 online presence
- Location awareness and maps
